House 425, Senpara Parbata, Mirpur, Dhaka - 1216

## SKILLS

Manual Testing
Automation Testing
CI/CD
Version Control
Front End Development
Backend Development
Problem Solving
Detail Oriented

Communication
Team Player

## EDUCATION

North South University
**2018-2022**
BSC in Computer Science and Engineering
CGPA 3.48

British Council
**2015-2017**
GCE A Level

British Council
**2014-2015**
GCE O Level

## PROFILE

I have experience as a test automation engineer and a web developer using front end and back-end technologies. I can create websites with HTML5, CSS3, JavaScript, React.js, Bootstrap and Tailwind CSS, MySQL, MongoDB, Node.js and Express.js. I know how to automate testing web products with JavaScript, Selenium WebDriver and WebDriverIO as well as using manual testing tools such as Postman, Jira, and others. I also have sound knowledge of programming constructs which allows me to learn any language with ease.

## EXPERIENCE

QA AUTOMATION ENGINEER - INTERN

**2023 Feb – 2023 Jul**

I learned the basics of web UI automation testing using Selenium WebDriver such as the Writing Proper Selectors, The Page Object Model, Base Page, and Base Element Classes and made a small automation framework. Furthermore, I learned to automate API Testing and Database Testing as well as learning version control such as GIT and CI/CD with Jenkins. Additionally, I learned to write clean code which made the overall workflow easy to work with for other developers. Finally, I finished the internship by creating a testing framework of my own with all I learned and finished the final project with great success.
